PREFATORY.

The importance and usefulness of such a publication as our PAPER MILL DIRECTORY OF THE WORLD are too patent and pronounced to make any extended remarks on this point necessary here.

The labor and expense of procuring and properly arranging the material for such a book are vital elements to be considered in planning for its publication, and are of a nature at once suggestive of great delays and discouragements.

We have, however, spared no pains or careful consideration in collecting and collating the matter which goes to make up this work, and to render it as complete and accurate as it can well be made. Having once broken the ground, we shall be able to improve upon the initial number, in various ways, in our future annual issues.

The statistical information of our Directory will be found of more than passing interest and import. For instance we gather from its pages that the number of paper and pulp mills in the various countries is as follows:

United States,	1,099	France,	555
Dominion of Canada,	56	German Empire,	1,108
Central America,	8	Austro-Hungary,	438
South America,	2	The Netherlands,	72
England,	289	Belgium,	56
Scotland,	67	Switzerland,	57
Ireland,	15	Spain,	118
Isle of Man,	2	Russia,	139
Italy,	205	Sweden,	80
Norway,	44	Denmark,	12
Portugal,	18	Algiers,	6
India,	5	Japan,	6
Australia,	4	New Zealand,	2
Total,			4,463

HENRY H. TABER,

5 Barclay, Street, New York.

Mr. H. H. Taber, 5 Barclay Street, City: New York, April 12, 1883.

Dear Sir,—In reply to your request, we take pleasure in saying that the cover put on our 60x24 inch pulley is running entirely satisfactory. We consider it a great saving in power and wear on the belt. We have two or three other large pulleys that we wish covered as soon as we can spare them.

Inclosed please find check for amount of your bill. Truly Yours, G. W. THOMPSON,
Sec'y Diamond Paper Mills Co.

Has been awarded the Grand Prize Gold Medal, and recommended the Medal of Honor and Perfection, at Paris, 1878, *this being the Highest and Only Award given for*

Linen Record and Ledger Paper

A SPECIALTY.

This Paper has received the HIGHEST PREMIUM over all others from the *Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanic Association, Franklin Institute* of Philadelphia, Louisville Exposition, Medal and Diploma from *United States Centennial Commission, Medal of Progress American Institute,* 1877, *and Medal of Improvement and Progress, Boston,* 1878.

ITS PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its non-chemical action upon ink is such that it both writes and rules up better. This Paper is *Double Sized,* and will stand any climate or the most acid of fluid inks. ☞ Send for sample sheet. **Erase and Re-Write Four Times on the same spot. Each Sheet is Water-Marked with Name and Date.**

TIEMANN'S LUNAR OIL

Non-explosive, Pure Water White, 150° Fire Test.

THE PUREST ILLUMINATING OIL IN THE MARKET. ALL IMPURITIES BEING REMOVED, IT DOES NOT CLOG THE WICK. DOUBLE REFINED, FREE FROM OFFENSIVE ODOR, AND DOES NOT SMOKE.

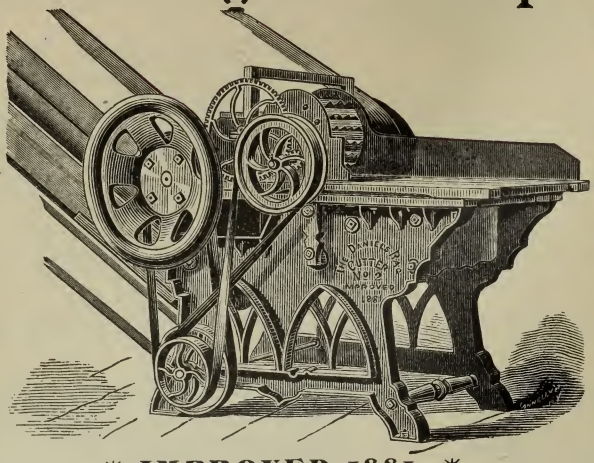
GATES CURTIS,

Ogdensburg, N. Y.

The Daniels Rag Cutter Improved

CHAMPION OF THE WORLD.



CHAMPION OF THE WORLD.

IMPROVED 1881.

THIS Cut represents our improved Iron Frame Rag Cutter, with the iron frame and other improvements which we have made on our Cutter within the last three months. We can say, with all confidence, we have the best Cutter in the UNITED STATES. Those having Wood Frame Cutters of our make which have become worn and shaky, can have Iron Frames and their Cutters thoroughly repaired by sending all the iron work to us; and with the addition of the Iron Frame you can have a stronger and better Cutter than ever.

Description of and Directions for Setting up and Using Said Cutters.

OUR No. 2, ONE-BLADED CUTTER

is the best adapted for cutting LARGE and HARD stock, such as large and hard ROPES and SACKING, without splitting them, as is necessary with other machines. They are self-feeding, and the feed is so arranged that by changing pulleys (which can be done in a very few minutes) the desired length of cut is obtained. An apron is attached to carry off the stock as it passes from the machine. This machine, running at a speed of 250 revolutions per minute, and well tended, with the feed set to cut two inches long, will cut 1,000 lbs. of sacking per hour.

Weight of machine, 2,000 lbs.; driving pulley 22-inch diameter and 5-inch face. Should run 250 revolutions per minute.

OUR No. 2, TWO-BLADED CUTTER

is similar or nearly like the One-Bladed Cutter, excepting it has two blades on the cylinder intsead of one, making two cuts at every revolution, and is always in balance, and on SOFT AND MOST KINDS OF HARD STOCK, if run 300 to 350 revolutions per minute and well tended, will do nearly double the work of the One-Bladed Cutter.

Weight of machine 2,000 lbs.; driving pulley 22-inch diameter and 5-inch face. Should run 300 to 350 revolutions per minute.

OUR No. 3, ONE-BLADED ROPE KNOT CUTTER

is manufactured expressly for cutting rope knots. Is self-feeding, and will not let a knot of one inch or more in size pass by the knives without being cut. They cut rope as well as our other machines, and sacking and other paper stock very well but not as fast.

Weight of machine, 2,000 lbs.; driving pulley 22-inch diameter and 5-inch face. Should run 200 to 250 revolutions per minute.

OUR No. 3, TWO-BLADED ROPE KNOT CUTTER

has two blades instead of one upon the cylinder, making two cuts every revolution, and with few exceptions will cut the same kinds of stock as the One-Bladed Cutter, cutting most kinds very much faster.

Weight of machine, 2,000 lbs.; driving pulley 22-inch diameter and 5-inch face. Should run about 300 revolutions per minute.

These machines we warrant superior to those now in use for durability and despatch of business. The reputation of these machines for their various uses is not surpassed by any others manufactured, premiums ever having been awarded them over others when exhibited.

ISAIAH BENSON,
WALES N. JOHNSON, } Propr's. **Daniels Machine Co., Mfrs., Woodstock, Vt.**

THE

Commercial Safety Paper

Prevents the raising of checks, drafts, etc. From all other Safety Papers on the market, the ink or writing is as easily removed as from ordinary white paper, the only protection being the changing of the tint or color. The Commercial Safety Paper is so treated chemically in its manufacture that the ink used in writing upon it

Combines with the Fibre of the Paper,

And hence it cannot be taken out without removing the fibre of the paper as far as the ink penetrates.

It is the only paper that has never been successfully altered by the use of chemicals. Endorsed by Clearing House Authorities of Philadelphia, St. Louis, and Chicago. Send for Circular. Manufactured by

MT. HOLLY PAPER CO.,

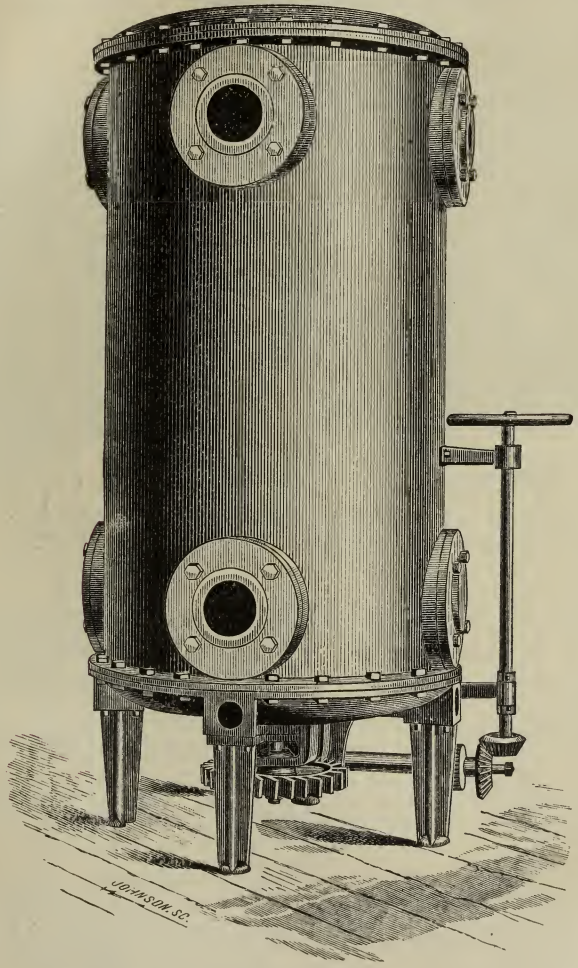
FILTERING THE MOORE MACHINE.

Extreme Height, 5 feet 6 inches, Diameter, 32 inches, Supply Pipe, 6 inches, Outlet 6 inches.

HOLYOKE, PAPER CO., HOLYOKE, MASS., Feb. 2, 1882.

The Moore Filtering Machine is in use in our mill, gives entire satisfaction, and I can recommend it as a practical devise for use in Paper Mills, or where large quantities of filtered water are required.

O. H. GREENLEAF, President.



HOLYOKE, MASS., Feb. 2, 1882.

This is to certify that we are using one of the Moore Filters—using it all through the time when the water was the worst, giving us ample water for two engines, and I can safely say that it is the best filter for paper mill use, where a large quantity of water is wanted, than anything I have ever seen or tried yet, and can recommend it to any one wanting filtered water.

D. P. WILLIAMS, Superintendent Holyoke Paper Co.

Patented in the United States July 19, 1881, also in England, France, Germany, Belgium and Canada.

The Only Filter in which the principle of "control" has been perfected. *The Only Filter* which exteriorly indicates the condition of the filtering material in it, and the precise position of the working parts. *The Only Filter* that will give large results with a low head of water. *The Only Filter* that can always be cleansed without removing the filtering material. It will operate freely without cleansing for a longer time than any other Filter. It is superior in its construction, operation, and in the quality and quantity of the filtrate furnished, to any other device yet invented.

Public Comparative Test invited (in Holyoke) with any other Filter.
